

# Youth Dialogue

WITH  
EXPERTS  
ACROSS  
SECTORS

TOWARDS CO-CREATION

HOSTED BY WWF-NL

**We want to hear your ideas!** The climate and biodiversity crisis is an issue Dutch youth are concerned about; it concerns your future. However, too often you find yourself on the sidelines of decision-making processes. We want to collaborate with you on a climate resilient and nature positive future for the Netherlands, but we cannot move without your ideas, energy and perspectives. So, are you passionate about **youth leadership, community empowerment, real action**? Please come to our youth dialogue to discover areas on which we can collaborate and goals we can realize together, so that we can turn your voice into concrete solutions!
